

Creating Your XORVANIQ Account

Version 1.0.0 | Updated 2026-09-05 | 1 min read

Preparation / invited access

In this guide: [Before you start](#) | [Steps](#) | [Verify the result](#) | [Help and related information](#)

The unified account is in private validation. Public self-service registration is not yet verified. These are preparation steps for an invited account.

Before you start

Use the access and features actually assigned to your account. Keep a rollback or recovery route before changing existing service settings.

Steps

1. Request access through the published contact page; an inquiry does not create an account.
2. Use the exact invitation and sign-in address supplied through the approved channel. Check the domain before entering credentials.
3. Verify ownership using the normal process shown by the identity provider. Choose a unique password or an offered passkey.
4. Set up recovery before linking services. Keep existing product logins available until migration acceptance.

Verify the result

An invited sign-in succeeds and shows only your own organization and services. A missing invitation remains an access gate, not an error to bypass.

Help and related information

Contact support, service status, and Customer Access. Never send passwords or recovery codes.
