

VPN: Getting Started

Version 1.0.0 | Updated 2026-09-05 | 1 min read

Preparation / invited access

In this guide: [Before you start](#) | [Steps](#) | [Verify the result](#) | [Help and related information](#)

VPN service is in private validation. Connect only using an approved account and assigned route.

Before you start

Use the access and features actually assigned to your account. Keep a rollback or recovery route before changing existing service settings.

Steps

1. Obtain the profile through the approved provisioning channel.
2. Confirm the supported client, intended traffic scope and recovery route.
3. Import the profile without sharing or photographing private key material.
4. Test the assigned route and ordinary service access before relying on it.

Verify the result

The assigned tunnel carries the intended traffic. A connected icon alone does not prove leak protection or route restrictions.

Help and related information

Contact support, service status, and Customer Access. Never send passwords or recovery codes.
